HOW TO STAY HUMAN IN A TECHNOLOGY DRIVEN SOCIETY?

INTERNATIONAL WEEK MAR 9 - MAR 13

Be aware of developments from the world of creativity, innovation and technology during this international week. Topics like human interaction, ethics, cyber security, gamification, playful interaction. The programme consists of a kick-off, project work, talks, workshops, inspiration sessions and an interactive expo. And also a lot of fun in an amazing educational space!

More detailed information of the project assignment and involved stakeholder/client will be published early 2026.

Goal of the project

Use creativity and knowledge to think about and discuss a creative innovative prototype and solution. Experience in an international triple helix environment. Compete with other project teams. Have fun!
