

INNOVATE RESILIENT SUPPLY CHAINS

Blended Intensive Programme (BIP): 12-16 October 2026

About the programme

Assignment

Help to transform supply chains into smart and resilient systems that leverage the latest high-tech innovations, reduce time-to-market and costs, improve overall effectiveness and actively support entrepreneurship and small businesses

Before the BIP takes place

We kick off online with interactive brainstorming sessions to get to know each other, form well-matched teams, and identify promising topics. During this session, teams will choose and divide subjects to work on in the run-up to the BIP, so everyone starts the programme with a clear focus and shared goals

During the BIP

Experience an intensive on-site week at Fontys Tilburg where you will explore how agentic AI can transform supply chains into smart, resilient systems that leverage the latest high-tech innovations, reduce time-to-market and costs, boost overall effectiveness, and foster entrepreneurship in small businesses

Target Group

Students and young professionals in Artificial intelligence, Full Stack Development, IoT, M2M, Cyber security, Business Process or Management

Key areas

- Supply Chain Modeling & Management
- Agentic AI
- Smart Technologies in Supply Chains
- Cyber Resilience & Risk Management
- Sustainability & Circular Supply Chains
- Entrepreneurship & Small Business

3 ECTS
